EDUCATION

Stony Brook University | GPA: 3.55 Expected May 2027
B.S., Computer Science and Business Management (Double Major) | Finance Specialization
Coursework: Investment Analysis, Principles of Finance, Software Engineering, Introduction to Data Science

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, Solidity, Pine Script
Frameworks and data: React, Node.js, ethers.js, pandas, NumPy, SQLite, REST APIs
Tools and finance: Git, GitHub Actions, TradingView, Excel, options analytics, position sizing

SELECTED PROJECTS

GEX Options Exposure Dashboard | TypeScript, Node.js, HTML Canvas
- Developed a TypeScript dashboard that calculates Black-Scholes gamma from option-chain data and displays exposure by strike, gamma-flip levels, and call/put walls.
- Integrated Cboe delayed data and a Tradier adapter; shared option-chain polling across viewers and streamed filtered results through Server-Sent Events.
- Checked gamma against numerical derivatives; tested market calendars, feed failures, and stream restarts.

DAMD Treasury Wallet | React, Solidity, ethers.js, MetaMask
- Collaborated on a React/Solidity treasury-wallet prototype supporting test ETH deposits, M-of-N owner approvals, payment timelocks, and per-payment and daily spending caps.
- Integrated an ethers.js service for contract reads, transaction previews, signing requests, and state refreshes after confirmations, account changes, and network switches.
- Added GitHub Actions checks for linting, contract compilation, service and contract tests, and production builds.

Robinhood Agent | Python, Claude Agent SDK, MCP, OAuth
- Built a Python agent using the Claude Agent SDK and Robinhood MCP interface to review portfolio holdings, buying power, and proposed trades through an OAuth-authenticated connection.
- Added configurable strategy instructions, symbol restrictions, and prompt-level spending limits, with dry-run defaults, explicit live-trading opt-in, and one-shot or scheduled execution.

MA/EMA and RSI Trading Indicator | Pine Script v6, TradingView
- Created three configurable entry modes combining moving-average trends, RSI crossovers, and pullback conditions; tracked long/short/flat states with exit priority and entry/exit alerts.

EXPERIENCE

Warby Parker | Sales Advisor (Part-time) Aug 2025 - Present
- Guide customers through frame, lens, and pricing decisions; manage order placement, payments, returns, and adjustments while supporting store sales goals.

FundingWire | Business Development Intern Jul 2026 - Aug 2026
- Researched and qualified partnership targets for a startup funding-intelligence platform; tailored outreach to startup organizers and LinkedIn groups.
- Built a prioritized pipeline of NYC and virtual speaking, pitching, and conference opportunities; booked partnership meetings for the CEO.

Digital Girl Inc. | Intern Jul 2025 - Aug 2025
- Built and published HTML/CSS websites through Code.org projects and created digital flyers for community programs.
- Coordinated guest lists and program logistics, and tracked attendance and engagement for post-event reporting.

Computer Care and Learning | Intern Jul 2024 - Aug 2024
- Resolved Outlook and printer issues, maintained backups and file systems, and supported QuickBooks setup.

TRAINING AND CERTIFICATIONS

Forage job simulations: Citi, Wells Fargo, JPMorgan Chase (software development and engineering).
Microsoft Office Specialist: Excel and Word Associate (Office 2019), Aug 2025.
